

Bandaru Prabha Supriya

6302609978 | prabhasupriya.b@gmail.com | [LinkedIn](#) | [GitHub](#)

CAREER OBJECTIVE

Aspiring Software Engineer with strong problem-solving skills and a solid foundation in data structures, machine learning, and system design. Seeking to contribute to advanced technology solutions in high-impact domains.

EDUCATION

Degree	Specialization	Institution Name	Passing Year	CGPA
B.Tech	AI & ML	Aditya Engineering College	2027	9.75
Intermediate	M.P.C	Narayana Junior College	2023	9.78
SSC	State Board	Narayana School	2021	10.0

TECHNICAL SKILLS

Languages: Python, Java, C, C++, SQL, JavaScript
Web Technologies: HTML, CSS, React.js, Node.js, Express.js
Frameworks & Tools: Spring Boot, Git, Linux, VS Code
Core Concepts: Data Structures, Algorithms, OOP, DBMS, Operating Systems
AI/ML: Machine Learning, Deep Learning, NLP, Computer Vision, Collaborative Filtering, Matrix Factorization (SVD)
Data & DevOps: Tableau, Excel, EDA, Docker, Docker Compose, Volume Mapping ,Redis

INTERNSHIPS

Infosys Springboard Internship – Digital Civic Engagement & Petition Platform | *Full Stack Development*

- Worked on a MERN stack based Digital Civic Engagement & Petition Platform.
- Designed scalable system architecture and implemented efficient backend logic for handling user interactions and data processing.
- Gained hands-on experience in full-stack architecture, REST APIs, and database integration.
- Collaborated in Agile environment and improved debugging and deployment skills.
- Applied problem-solving and debugging techniques to optimize application performance.

Machine Learning Internship – 1Stop.ai | *Python, Scikit-learn*

- Built predictive ML models including Bike Demand Prediction and Diabetes Detection.
- Performed feature engineering, preprocessing, and model evaluation.

AICTE Edunet Internship – Sustainable Energy & Efficiency

- Worked on sustainability and energy efficiency problem statements.
- Applied analytical and research skills to propose tech-driven solutions.

SmartInternz (APSCHE) Internship – Hematovision Project

- Developed ML/DL models to classify blood cells using image datasets.
- Improved model accuracy using CNN techniques and preprocessing.

PROJECTS

AI-Based College Query Chatbot | *Python*

- Developed a simple chatbot using Python to answer student queries.
- Implemented basic NLP techniques to improve responses.

Prompt Routing AI System (Intent-Based Multi-Agent AI Service) GitHub

- Engineered a scalable AI routing system using **intent classification** and dynamic prompt selection.
- Reduced response ambiguity by replacing monolithic prompts with **modular expert personas**.
- Implemented classifier with structured JSON output: `{intent, confidence}` and robust fallback handling.
- Designed low-latency routing pipeline using **FastAPI** and optimized LLM calls.
- Integrated logging system (`route_log.jsonl`) for tracking model decisions and improving observability.
- Handled edge cases including **ambiguous queries, multi-intent inputs, and invalid responses**.

High-Performance ML Feature Store Backend | *FastAPI, Redis, Docker* GitHub

- Developed a real-time ML feature serving backend using **FastAPI + Redis** achieving **14ms latency**.
- Designed async ingestion pipeline processing **100K+ feature updates** with Redis optimization.
- Deployed microservices using **Docker Compose** with strong data validation via **Pydantic**.

CERTIFICATIONS

Deloitte Australia Data Analytics Virtual Experience

Completed job simulation on Forage involving data analysis, Excel classification, and Tableau dashboard creation.

July 2025

AlgoUniversity – Top Coder Recognition Certificate

TCS CodeVita Season XII – Global Rank Certificate

Awarded for securing Global Rank 2201, recognizing exceptional coding skills in a worldwide programming contest.

CodeChef Certificate (500 Difficulty)

NVIDIA Deep Learning Workshop Certificate

Coursera React Web App Certificate

NPTEL (AI, DBMS), HackerRank (Python, SQL), HP Life, Unstop, TCS iON

Tata GenAI-Powered Data Analytics Virtual Experience –Completed Forage job simulation focused on EDA, AI-driven risk profiling, and business storytelling for collection strategies..

ACHIEVEMENTS

TCS CodeVita Round 2 Qualifier

CodeChef 1-Star Coder , HackerRank 5-Star (Java, Python, SQL, C++, Problem Solving)

Google TechSprint Hackathon Finalist

10 CGPA – B.Tech Semester 1

Merit Certificate – Academic Excellence

EXTRACURRICULAR ACTIVITIES

Google Developer Student Club (GDSC) Member – Exploring AI & software development

Campus Ambassador – SmartEd

Public Speaking & Debate – Participated in college competitions

Community Engagement – Volunteered in AI awareness initiatives

IoT Workshop – Active participant, gained practical experience

SOFT SKILLS

Logical Thinking & Problem-Solving

Teamwork & Collaboration

Effective Communication

Quick Learning & Adaptability

Strong foundation in analytical problem-solving and algorithmic thinking.
